OFFERED TRANSFER ACTIVITIES

services to bring together parties that could be relevant for the application of new ideas and technologies

- implementation of visits in research institutes or enterprises
- implementation of meetings, workshops, conferences (e.g. for initiating and intensifying contacts between science and business, for discussing detail information about innovative ideas and technologies)
- sub-sequential evaluation of discussions between technology suppliers (similar to licensors) and technology users (similar to licensees), such as finding out whether the partners can go on discussing the technology/ results independently or need additional support

services in terms of the preparation of economic exploitation of an (innovative and economically applicable) idea/ technology

- research cooperation: Only limited - in cases where the aim of the research is neutral or unidentifiable
- concepts for and execution of qualification measures for the future personnel focussed on the exploitable idea/ technology (e.g. conceptual design and implementation of trainings, e-learning, workshops): Effort to put over the SAP courses at Faculty of Social and Economic Studies UJEP

services in terms of collective advancement of innovative and economically applicable ideas resp. research fields

- support to the establishment of students' projects and looking after the students' work in the form of preliminary studies aimed at: the preparation of the implementation of innovative ideas/ new technologies in enterprises; the application of scientific results to tackle with practical problems in enterprises; the detection of deficits and bottlenecks that could make the application of new ideas and technologies in the enterprises difficult: University of Chemistry and Technology in Prague, TU Liberec, Earlier Faculty of Production Technology and Management UJEP, Setting topics for students – mostly design for modifications of current practice
